

PROJECTS

Gulp | nkhem-gulp.herokuapp.com

4/2017

A single-page search engine for drinks-related businesses in SF with a Postgres database, Ruby on Rails on the backend, and JavaScript with React/Redux on the front

- Updates React components in real time by changing incoming props via AJAX requests
- Uses external APIs to seed the database with Yelp business data and to render business markers on a Google map that responds to events using vanilla JS
- Implements secure account creation & login through BCrypt and session tokens

Planarity Knot | nkhem.github.io/planarity-knot

5/2017

A dynamic online game written in vanilla JavaScript, HTML, and CSS

- Uses custom algorithm to randomly generate and render non-planar graphs of increasing difficulty
- Dynamically tracks and displays current points and lines based on mouse movement
- Incorporates planar graph generation algorithm to generate graphs of increasing difficulty

TECHNICAL SKILLS

Ruby • Ruby on Rails • JavaScript • jQuery • React • Redux • SQL • Git • HTML • CSS

EDUCATION

Stanford University

6/2017-present
